

Swarm Plan Changelog (Append-Only)

This document tracks all formal modifications to the research plan, backlog prioritization, timebox estimates, and data source allocations.

[2026-08-28T14:22:00Z] Initial Milestone 1 Architecture Plan

- **Tier:** Overseer
- **Proposer:** DELTA
- **Co-signer:** OVERSEER
- **Change:** Established baseline M1 foundation architecture: SQLite WAL persistence with 12 tables, 5-state directory lifecycle machine, 8-field Agent Memo specification, runtime testnet guardrails, and seeded 5-idea backlog.
- **Rationale:** Foundational milestone plan initialization per PROJECT.md specification.

[2026-08-28T14:30:00Z] Backlog Priority Reordering & Idea 03 Deep Dive

- **Tier:** Autonomous
- **Proposer:** ALPHA
- **Co-signer:** GAMMA
- **Change:** Confirmed backlog execution order: Idea 03 (Cross-Exchange Spread Capture) designated as primary deep-dive through Phase E; Idea 01 (Cash-and-Carry) prioritized second; Idea RS (Bounded OU) third; Idea 02 and 04 assigned Phase A/B paper trails and deferred.
- **Rationale:** Idea 03 provides the highest structural risk-adjusted yield potential in volatile funding regimes and exercises the complete multi-exchange execution and desync watchdog architecture.

[2026-08-28T14:40:00Z] Bounded Agent Research Slot (RS) Addition

- **Tier:** Autonomous
- **Proposer:** GAMMA
- **Co-signer:** BETA
- **Change:** Added [idea-rs-ou-mean-reversion](#) (Bounded OU Mean Reversion Spread Model) to the research backlog under statistical arbitrage. Bounded timebox of 4.0 hours completed with mathematical specification and half-life filters (2h - 48h).
- **Rationale:** Peer-reviewed quantitative finance literature demonstrates robust mean-reversion characteristics in cross-exchange funding spread time-series.

[2026-08-28T14:50:00Z] Milestone 5 Pipeline Execution & Idea 03 Promotion

- **Tier:** Autonomous
- **Proposer:** ALPHA
- **Co-signer:** DELTA
- **Change:** Executed full pipeline across all 5 strategies. Idea 03 promoted through Gate Decision to [/paper](#) for continuous live testnet paper trading following unanimous 4-agent quorum. Phase A + B paper trails completed for Ideas 01, 02, 04, and RS.
- **Rationale:** Satisfies all Milestone 5 delivery criteria with zero silently dropped ideas and complete audit trails.
